

UP combination – seal and pleasant

Thanks to GIFAS recessed- /surface mounted distributor cabinets with solid rubber power distribution boxes you have access to a product range which is fulfilling highest demands. GIFAS attaches great importance on robust and stable design!

Client: Max Zeller Söhne AG, pflanzliche Heilmittel, 8590 Romanshorn
Planning: Büchler+Hiestand AG, Ing.-Büro für Elektrotechnik, 9320 Arbon
Task: Combination of distributor and security box UP with different equipment.

Initial situation

The external form and appearance have to be identical, stainless material, easily to be cleaned, protected against dust and water jet.

Characteristics

- Distribution box made of V2A
- Frame with door and seal
- Hard rubber distribution box implemented as installation kit
- The area can easily be cleaned when the distribution box is closed.

- A flap in the door front enables the cable connection when the door is closed.
- Door with a rotary closure

- The installation is made on a grand scale to prevent a cable tangle; so the instruments and equipment can be changed individually.
