

Campetto «Old-town Rheineck»

Electric power is available at the right spot for every event thanks to our Campetto underfloor distribution system.

Customer/installation engineer:	EW Rheineck (power station)
Requirement:	Power supply for events in the historic quarter
Solution:	Campetto 4
Quantity:	34
Areas of application:	marketplaces, pedestrian zones, sport and leisure centres, industrial buildings, truck parking areas

Initial situation

The power supply was redesigned during the redevelopment of the old town Rheineck. They wanted to provide quick and easy access to electricity for markets and other events in the historic quarter without large installations.

Our Campettos ensure that power is now available at various points in the old town. Simply open up and plug in.

Customer benefits

- electrical power is available anytime and in seconds
- no power cable lying around, therefore no stumbling danger
- temporary installations are no longer needed
- protection against vandalism thanks to lockable cover
- almost invisible when not in use
- maintenance-free and no operating costs
