

Village fountain in Thalheim illuminated by CircLED and VisuLED HOME

Old village fountain put in a new light

Customer/installation engineer:	Community Thalheim
Requirement:	Renovation of village fountain with illumination
Solution:	CircLED and VisuLED HOME
Article:	860160, 860105 and 182635
Quantity:	5×CircLED 3'500K, 3×VisuLED HOME 4'000K, 1×power supply distributor
Areas of application:	Railway station, garage entrances, roundabouts etc.

Starting situation

The fountain in the middle of the village of Thalheim dates from 1837 and needed to be renovated. Since the paved square also had to be renewed, in-ground lighting was the obvious choice. Discreet accent lighting was implemented with the CircLED and the VisuLED HOME from GIFAS.

The venerable village fountain is now beautifully showcased.

Customer benefits

- high energy efficiency thanks to latest LED technology
- very low power consumption
- long lifetime
- safe installation thanks to extra-low voltage
- low maintenance
